Arts Academy  
Charter Middle School

# Harmonizing Technology for a Future-Ready Arts Academy

---

## Background & Challenge

Arts Academy Charter Middle School (AACMS) serves approximately 350 Lehigh Valley and eastern Pennsylvania middle school students interested in the performing and visual arts. AACMS' mission is to provide opportunities for students to explore their passions and talents in a supportive, challenging, rigorous academic and artistic environment. To fulfill this mission, it became imperative to revamp the school's technological infrastructure and optimize its operating information systems.

## Our Custom IT Solution

In 2023, Custom IT Solutions (CIT) began providing AACMS services and guidance related to all aspects of IT, including navigating a change in computing devices. With the help of CIT, AACMS seamlessly moved from a laptop-based system to Chromebooks for students. CIT assumed the duties previously held by on-site personnel, remaining present to readily problem-solve from the initial transition phases to assisting in day-to-day issues and learning curves.

## Results

AACMS is “**very satisfied**” with a more efficient and effective IT system that directly supports its academic and artistic mission. Their collaboration with CIT facilitated the transition to Chromebooks, which led to benefits such as cost savings, easier device management, and improved compatibility with modern educational technologies.

CIT’s involvement suggests a commitment to staying updated on technology trends and ensuring AACMS remains adaptable and future-ready. The response to CIT’s partnership has been overwhelmingly positive, aligning with AACMS’s commitment to providing students with a supportive, rigorous academic and artistic environment for years to come.

*“The move has proven to be an excellent choice for us. CIT has provided effective and timely service and solutions for AACMS. The various technicians and personnel from CIT have been readily available to help solve the myriad of issues that occur in our school.”*

Seeking a transformative IT partner of your own?
